# ALZHEIMER'S DISEASE UPDATE CONFERENCE

## Statement of Need

Every 65 seconds someone in the United States develops Alzheimer's disease. It is estimated that 5.7 million Americans are currently living with Alzheimer's dementia, with the number growing to 7.1 million Americans by 2025. There is a heightened need for healthcare professionals as well as policymakers to address the specter of an increasing prevalence of Alzheimer's disease in an aging society. The goal of this conference is to improve the diagnostic and therapeutic capability of healthcare professionals who care for persons living with dementia and their caregivers.

*Source: 2018 Alzheimer's Disease Facts and Figures, Alzheimer's Association*

## Objectives

- Identify cutting-edge approaches to the diagnosis of Alzheimer's dementia and related disorders across diverse communities.
- Describe evidence based, culturally tailored care management strategies for patients with cognitive disorders.
- Identify effective strategies to support and engage caregivers of persons living with dementia.

## Elements of Competence

This activity has been designed to change learner competence and focuses on the American Board of Medical Specialties areas of medical knowledge, and patient care and procedural skills.

This activity also focuses on the interprofessional competencies of roles/responsibilities and teams/teamwork.

## Policy on Faculty and Sponsor Disclosure

It is the policy of the University of Wisconsin–Madison Interprofessional Continuing Education Partnership (ICEP) that the faculty, authors, planners, and other persons who may influence content of this CE activity disclose all relevant financial relationships with commercial interests in order to allow CE staff to identify and resolve any potential conflicts of interest. Faculty must also disclose any planned discussion of unlabeled/unapproved uses of drugs or devices during their presentation(s). Detailed disclosures will be made available in the activity handout materials.

**Wisconsin Alzheimer's Institute**  
UNIVERSITY OF WISCONSIN  
SCHOOL OF MEDICINE AND PUBLIC HEALTH

The Wisconsin Alzheimer's Institute (WAI) is committed to health equity and aims to improve the quality of life of persons living with dementia and their families across the state through research and community engagement. Our purpose is to increase awareness of Alzheimer's disease and related disorders, to identify and disseminate strategies to reduce dementia risk, to convene stakeholders across the state, to improve access to quality dementia care services, and to develop and support culturally-tailored, effective clinical and community-based models of care.
